Save Money, Make Money.

Trade Marketplace is a managed service, not a listing site. We set one fair, fixed price and take payment up front. Then a licensed sparky picks up the job, does the work and gets paid with the paperwork handled. Customers save money. Sparkies make money.

This is the business idea: the line for investors, partners and pitch decks. Customers hear it differently. Their line is on the pages that follow.

1. **Bold**
   Wide, heavy headlines that say it straight. Short words, big type, no fluff.
2. **Fast**
   The bolt: customer and trade meeting with no friction. One price, no back-and-forth, no chasing. Every screen should feel quick.
3. **Grounded**
   Fair fixed prices, licensed sparkies, a CoC every time. Deep forest green and plain Kiwi language keep it local and trustworthy.

Who We're For

To become a household name we have to get inside people's heads at the moment they need us. Two audiences, two very different moments.

CUSTOMER

Homeowners with a job that needs doing

Electrical first: a plug, a few downlights, a heat pump circuit. Other trades later.

"Will anyone turn up for a job this small?"

"Is this price fair?"

"Are they actually licensed?"

"I don't want a surprise bill."

THE MOMENT

A small job nobody wants to come out for, or a call-out quote that feels like a rip-off.

THEY NEED TO FEEL

This is easy. The price is fair. A real sparky's on it.

OUR PROMISE

Post it free.
One fair, fixed price.
CoC every time.

TRADE

Licensed sparkies wanting side jobs

Sole traders, semi-retired and between-jobs sparkies. Other trades later.

"I'd do side jobs, just not the paperwork."

"GST, invoices, IR3... no thanks."

"Chasing payment is a nightmare."

"What will I actually earn?"

THE MOMENT

Free evenings and weekends. Wants extra income without running a business.

THEY NEED TO FEEL

Good money, no risk, no admin. The customer's already paid.

OUR PROMISE

Pick a job.
Do the work.
Get paid.

Sorted in a flash.

Our consumer line. It's what someone should think the second they see the logo, the van or the app icon: **whatever it is, these guys will get it sorted, fast.**

WHERE	LINE
CONSUMER	**Sorted in a flash.** Ads, website, app store, socials, vans, merch. The everyday line.
PROMPT	**What needs doing?** The first thing the app and site ask. Our "Where to?". One box, one question.
TRADE	**You do the work. We do the paperwork.** Sparky sign-up, trade ads, trade-side app. No GST, invoices, IR3 or chasing payment.
BUSINESS	**Save money. Make money.** Investors, partners, pitch decks. Fair fixed price both ways.

Why it works

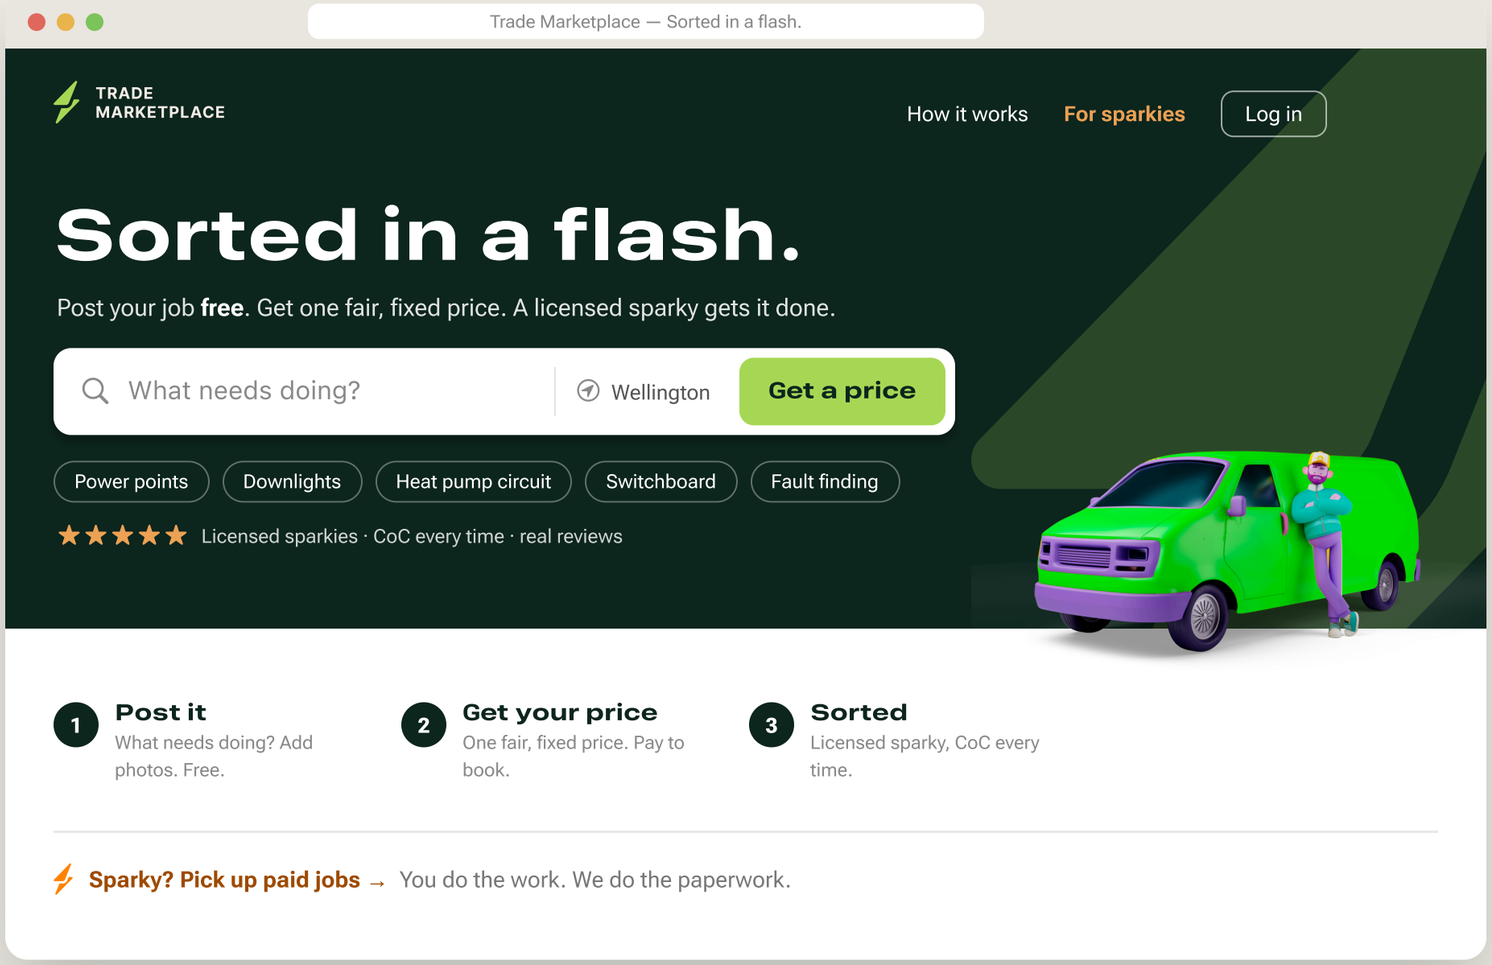

1. **"Sorted"** is how Kiwis and Aussies actually talk about a job done. It's the outcome, not the process.
2. **"In a flash"** is the bolt, and a spark. We start with electricians, so the logo, the line and the trade all say the same thing.
3. Works for any job size, from a single plug to a switchboard, and reads at van, billboard and app-icon size. The product has to back it up: price back fast, booked fast.

Also tested: "One fair price. Job sorted." · "Fair price. Licensed sparky. Sorted." · "Get it sorted." Competitors are listing sites where tradies quote against each other (hipages "change the way you tradie", Airtasker "task smarter"). Our difference is **one fixed price, paid up front, CoC every time. Run an IPONZ trademark check before launch.**

The First Five Seconds

When someone lands on the site or opens the app, they decide almost instantly if it's for them. The first screen has to answer every question in their head without them scrolling.

1. **"What is this?"**
   Three words: Sorted in a flash.
2. **"What will it cost me?"**
   Free to post. One fair, fixed price before anyone turns up. No surprise bills.
3. **"Is it for my job?"**
   One question, one box: What needs doing? Common electrical jobs underneath.
4. **"Can I trust them?"**
   Verified licensed sparkies, a CoC every time, real reviews.
5. **"I'm a tradie."**
   Their own door, in orange: pick up paid jobs.

Concept for the website home page. Forest text on the Lime button keeps it readable (9.6:1).

Becoming a Household Name

Uber didn't get famous by explaining ride-sharing. It made one thing feel effortless and showed up everywhere. Five habits to build the same way:

01

One obvious action

Uber opens with “Where to?”. We open with “What needs doing?”. One box, no menus, no sign-up wall before the first question.

02

Talk like people talk

Sorted, sparky, job, fixed price. Never “service provider” or “solution”. If you wouldn't say it at the pub, don't write it.

03

Own one symbol

The bolt means fast, and it's a spark. Put it on everything: app icon, vans, hi-vis, invoices, socials. Repetition makes a symbol famous.

04

Be seen on the job

Every sparky on the platform is a billboard. Van decals, hi-vis, invoices and the CoC hand-over turn every job into an ad.

05

Deliver the promise

Fame comes from word of mouth. One fair price, fast. A licensed sparky who turns up. A CoC every time. No surprise bills.

A note on the name

“Trade Marketplace” describes the category, which makes it hard to own. Nobody says “I'll Trade Marketplace it”. While the wordmark is being revisited, test new names on four things: **say it once, spell it once, use it as a verb (“just ___ it”), and the domain and trademark are free.** The bolt, colours and system in this document carry over to any name, and a name that isn't tied to one trade leaves room to grow past electrical.

Tone of Voice

We sound like a good tradie: straight up, friendly, no jargon, and on your side. Say it the way you'd say it over the fence.

Straight up

Say it plainly. Short sentences. Numbers over adjectives.

"Your price: $186, all in."

Kiwi-casual

Friendly and local, never slangy for the sake of it.

"Dodgy plug? Let's get it sorted."

Quick

Every word earns its place. Buttons are verbs.

"Post it" · "Pay & book" · "Claim job"

On your side

Like a mate who knows a good sparky. Fair, honest, no surprises.

"Extra work? We'll ask you first."

Words

WE SAY	WE DON'T SAY
job	~~project request, engagement~~
sparky, tradie	~~service provider, contractor partner~~
fixed price	~~quote, bid, tender~~
sorted	~~resolved, fulfilled~~
paid, earn	~~remuneration, disbursement~~
no surprise bills	~~variation charges may apply~~

Create Accounte	**Create account**
Save Money, Make Money. (splash)	**Sorted in a flash.**

02 — LOGO

Two Arrows, One Job

The bolt is two arrows. One is the **customer**, one is the **sparky**.

They move toward each other and lock together around the job. Trade Marketplace sits in that join: one fair price, payment held, paperwork handled. No haggling and no friction, just a fast connection. Together they make a lightning bolt: speed, energy and a nod to the trades.

> The two-colour version on this page explains the idea in pitch decks, about pages and onboarding. **The logo itself is always one colour.** Lime in customer mode, Amber in trade mode.

CUSTOMER

Has a job that needs doing. Posts it free, pays one fair price.

THE JOB

Where they lock together. TM holds it in place: fair price, payment held, paperwork done.

SPARKY

Has the licence and the time. Picks the job, does it, gets paid.

TRADE
MARKETPLACE

1

2

02 — LOGO

Primary Logo

The bolt mark and a stacked wordmark. Use the primary version, full colour on Forest, wherever you can.

1 **Bolt mark**

Customer and trade arrows locked together. Lime **#A6D754**. Amber **#ECA154** inside the trade-side app.

2 **Wordmark**

Inter Bold, all caps, +5% tracking, 100% leading, stacked on two lines. Cream **#F1ECE5** on Forest.

> **Interim wordmark.** The wordmark text may change in a future update. The bolt mark, lockup proportions, colours and usage rules in this document stay the same.

Logo Versions

Pick the version with the strongest contrast for the background. Never put the full-colour logo on a light background, because the bolt disappears.

Primary

Full colour on Forest. Customer-facing default: app, web, ads, vans.

Trade

Amber bolt. Only inside the trade-side app and on trade-only material.

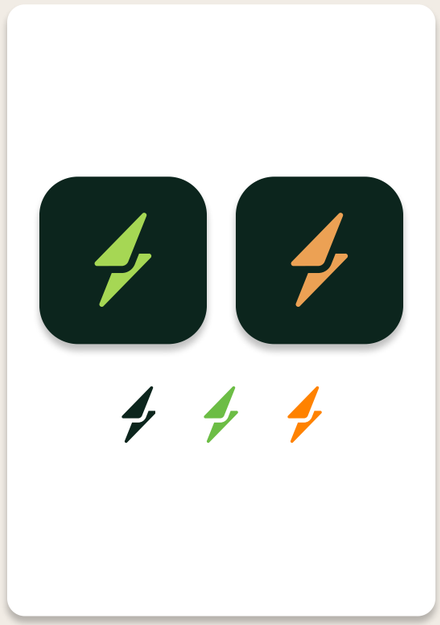

Reversed

Cream mono for photos, video and one-colour print. Darken busy photos first.

Positive

Forest mono on White or Cream: documents, invoices, CoCs.

Bolt Mark

App icons (one per app), favicon, in-app headers. Use it alone once the brand is already on screen.

Space & Misuse

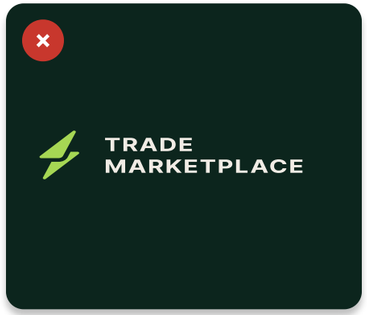

Clear space

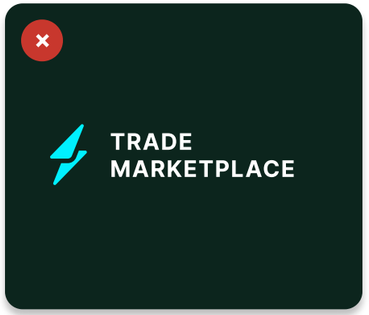

Keep clear space of **x** on every side, where x is the height of the word “TRADE”.

Minimum size

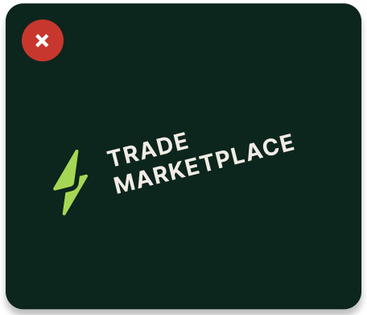

Digital: **24 px** tall (the compact header lockup). Print: **10 mm** tall. Bolt mark alone: 16 px / 6 mm.

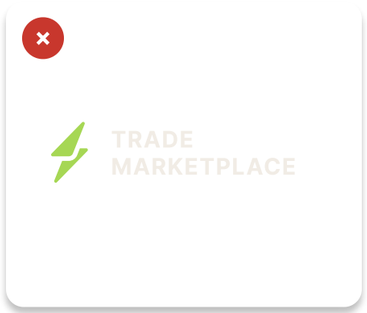

Don't stretch or squash

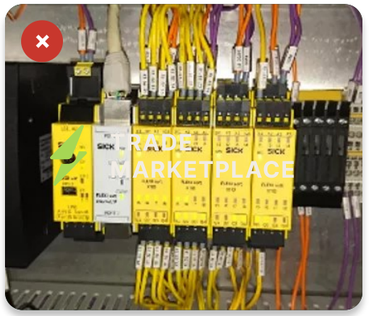

Don't recolour

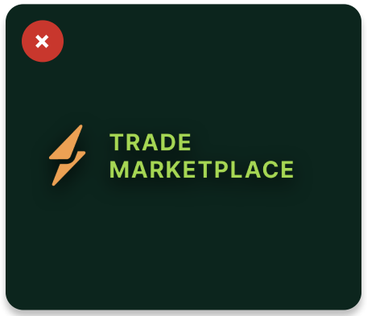

Don't rotate

Don't use full colour on light

Don't place on busy photos

Don't mix modes or add effects

Brand Colours

The core palette is shared by everyone. Each side of the marketplace then gets its own pair: **greens for customers**, **oranges for trades**. Pantone and CMYK for print are in the Print section.

CORE

Forest

Contrast

WCAG 2.1. Body text needs 4.5:1. Large or bold text (18.5 px bold and up) needs 3:1. White text on Leaf, Hi-Vis, Lime or Amber falls below 3:1. **Approved 21 Oct 2026:** button labels on coloured fills are Forest. On the web, links use **#326C20** (customer) or **#9E4A00** (trade), secondary text and field borders use **#52645B**, errors **#A12424** and focus **#2163C6**.

Aa	White on Forest **16.2:1**	AAA

Aa	White on Hi-Vis **2.5:1**	Avoid for text
Aa	White on Lime **1.7:1**	Avoid for text
Aa	White on Amber **2.1:1**	Avoid for text

04 — TWO MODES

One Brand, Two Modes

The colour you see depends on the account you're in. **Customers see green. Sparkies (and later other trades) see orange.** Forest, Cream, type, icons and layout never change, so it always feels like one brand.

Is it possible?

Yes. Role-based modes are a common pattern; Airbnb lets one account switch between travelling and hosting. The app reads the account type at log-in and swaps two colour tokens: **Action** and **Signature**. Anyone with both account types gets a switch in Profile, and the whole app re-themes instantly.

TOKEN	CUSTOMER	TRADE
Base Backgrounds, headers, headings	**Forest**	**Forest**
Action Buttons, links, "see all", valid states	**Leaf**	**Hi-Vis**
Signature Bolt, hero CTA, save, ratings, status tiles	**Lime**	**Amber**
Background bolt 20% on Forest	**Lime 20%**	**Amber 20%**
Neutrals & Cream Text, rules, chips, cards	**Shared**	**Shared**

The switch

Profile → Account mode. The active side fills with its action colour.

App icons

One app with modes uses the Lime icon. If trade ever ships as its own app, it gets the Amber bolt.

> **Rule of thumb:** if the screen is for someone **hiring**, it's green. If it's for someone **working**, it's orange. Shared screens (splash, log-in, sign-up, settings) and TM admin use the customer palette, because that's the brand the public sees.

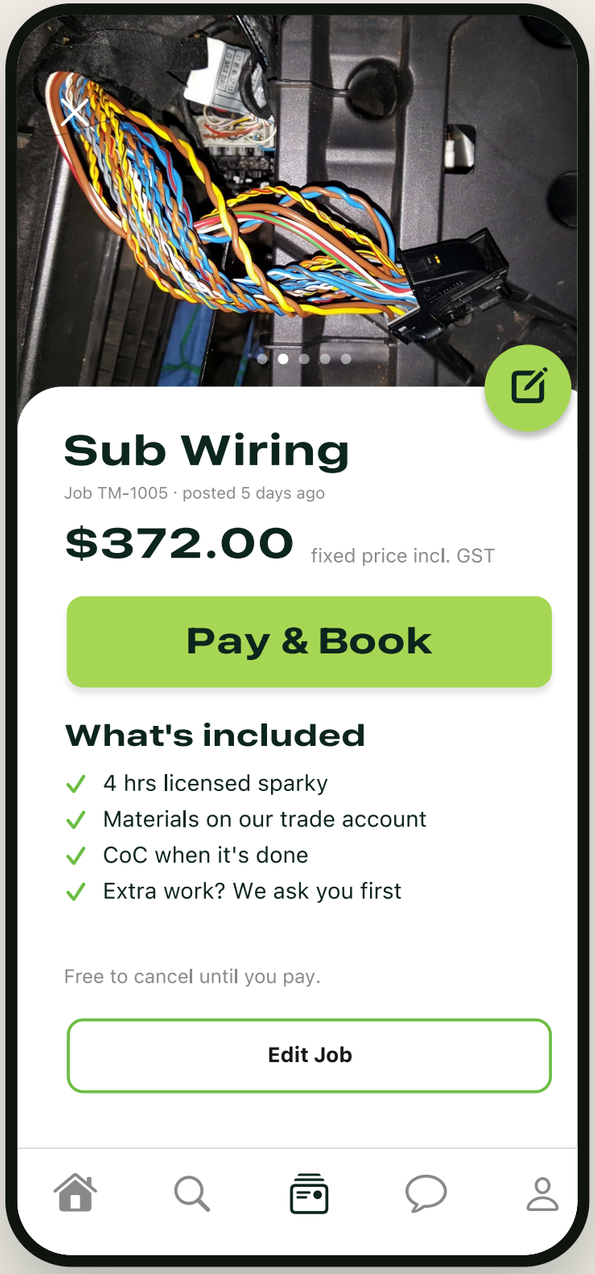

04 — TWO MODES

Same Job, Two Sides

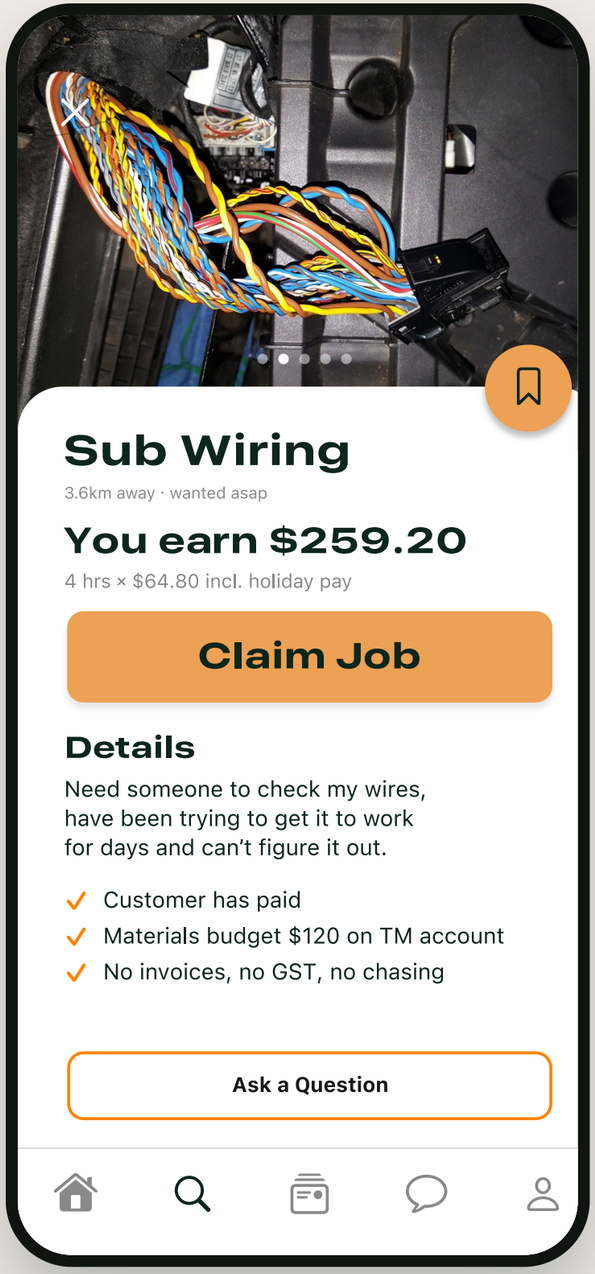

One job seen from both sides of the marketplace. Layout, type and Forest stay the same. Only the action and signature colours change.

1. **Customer:** their posted job with its fixed price. Pay & Book in Lime, Leaf for actions.
2. **Trade:** the same job on the job board. Sparky sees exactly what they'll earn. Claim Job in Amber, Hi-Vis for actions.

> Electrician screens in the web app (job board, estimates, claim, CoC upload) move to the trade palette. Button labels are Forest, per the approved contrast fix. Prices are examples from the draft business plan, which is still being worked out.

06 — GRAPHIC DEVICE

The Bolt

An oversized crop of the bolt mark sits behind hero areas: splash, log-in, account screens, covers and social posts.

1. Signature colour at **20% opacity**, on Forest only. Lime for customers, Amber for trade.
2. Scale it up so it **bleeds off at least one edge**. Never show it whole and small.
3. One bolt per layout, upright. Don't rotate or flip it.
4. Keep it behind content. Text and illustrations sit on top.

The Split

Screens open with a Forest block over White. Illustrations and cards straddle the edge to tie the two together. The Browse, splash and log-in screens already do this.

07 — IMAGERY

3D Illustration

Glossy, soft-lit 3D objects in a playful clay style. Tools and products are recoloured to a vivid brand green, with purple and red accents.

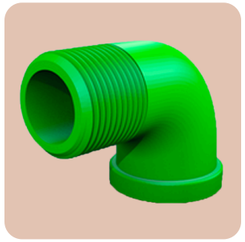

Electrical
and related

Construction
and related

Plumbing
and related

Saved
your saved jobs

1. One object per illustration, on a transparent background.
2. Category tiles: the object on a 30% tint square (radius 11) inside a white card.
3. Hero illustrations straddle the Forest/White split.

07 — IMAGERY

Job Photos

Jobs are shown with the real photos customers upload. Keep them honest: crop to fill and don't filter. The brand treatment comes from the frame, overlay and type.

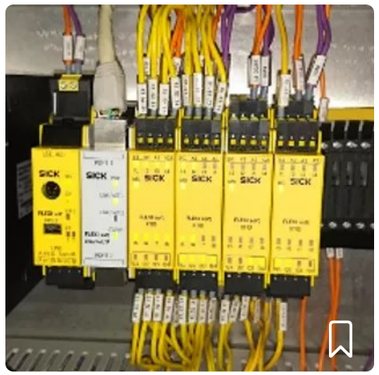

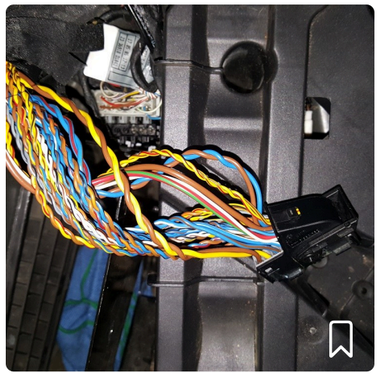

Feed cards

Radius 11, card shadow, dark gradient from the bottom, white Expanded Bold text: distance, trade, job.

Status tiles

Trade-side, so Amber: a wash from the bottom, the bolt and the status (e.g. “Estimated”) in Forest Expanded Bold.

08 — ICONOGRAPHY

SF Symbols

The app was designed and built in **Xcode** with Apple's **SF Symbols**, the icon set built into iOS. Every symbol is drawn to match SF Pro, so icons and text share the same weight, size and baseline automatically.

Where to get them

1. **Download the SF Symbols app**, free from Apple at **developer.apple.com/sf-symbols**. It needs a Mac. It has 7,000+ symbols in 9 weights and 3 scales, with search.
2. **Find a symbol and copy its name** (e.g. `bookmark.fill`). You can also export it as a template for Figma mockups.
3. **Use it in Xcode by name.** Nothing to install. It ships with iOS.

```
// SwiftUI
Image(systemName: "bookmark.fill")
    .font(.body)                          // size + weight follow the text style
    .foregroundStyle(mode.signature)      // Lime or Amber
// UIKit
UIImage(systemName: "magnifyingglass")
```

Rules

• Match the weight of the text next to it: Regular with body, Bold with buttons.
• Outline for default, **.fill** for selected or active (bookmark → bookmark.fill).
• Monochrome rendering. Forest by default, Grey when inactive, White on photos, signature colour for save and ratings.

Licence: Apple's bundled SF Symbols licence (§2A–2E) limits use to Apple platforms. Website use isn't granted. The web prototype temporarily uses the five original nav outlines (approved for the prototype only). **Before launch, replace them or get permission.** Candidate set: Material Symbols Rounded (next page).

Icon Set & Web Match

Every icon in the original app with its Unicode point, likely SF Symbol name, and the closest **Material Symbols Rounded** candidate for the pre-launch web replacement. Material Symbols is free (Apache 2.0) and pairs with Roboto Flex. **Jobs and Messages** need custom-drawn replacements to keep their original shapes.

```

Tokens & Modes in Code

Build every component from **semantic tokens**, never raw hex. Then switching an account from customer to trade is one attribute on the page (web) or one value in the environment (iOS). Nothing else changes.

```css
/* Existing tokens in src/styles/brand.css stay as they are.
   Add two semantic mode tokens on top: */
:root, [data-mode="customer"] {
  --trade-action:      var(--trade-leaf);   /* #6CBD45 */
  --trade-signature:   var(--trade-lime);   /* #A6D754 */
  --trade-link:        #326C20;
}
[data-mode="trade"] {
  --trade-action:      #FF8200;  /* Hi-Vis */
  --trade-signature:   #ECA154;  /* Amber  */
  --trade-link:        #9E4A00;  /* 6.1:1 on white */
}
.btn-primary { background: var(--trade-action);
               color: var(--trade-forest); }
.btn-hero    { background: var(--trade-signature);
               color: var(--trade-forest); }
a            { color: var(--trade-link); }
.logo-bolt   { fill: var(--trade-signature); }
```

Switching modes

```
// Web: after log-in, or when the user flips the switch
document.documentElement.dataset.mode =
  user.role === 'ELECTRICIAN' ? 'trade' : 'customer';

// iOS (SwiftUI): one environment value drives the tint
enum Mode { case customer, trade }
extension Mode {
  var action: Color    { self == .trade ? .hiVis : .leaf }
  var signature: Color { self == .trade ? .amber : .lime }
}
RootView().tint(mode.action)
```

Web icons

```
<span class="material-symbols-rounded">bookmark</span>
```

Keep the existing --trade-* token names from brand.css and add the mode tokens above. Material Symbols needs the stylesheet `Material+Symbols+Rounded:opsz,wght,FILL,GRAD@20..48,100..700,0..1,-50..200` or a self-hosted copy.

11 — PRINT

Print Colours

Spot colours are the closest Pantone matches to the screen colours. CMYK builds are converted for **coated stock (FOGRA39)**. Always proof on the final stock, and check a physical Pantone guide before signing off.

COLOUR	PANTONE COATED	PANTONE UNCOATED	CMYK (FOGRA39)	RGB / HEX	NOTES
Forest	**5535 C**	5535 U	85 / 51 / 71 / 82	#0C251D	Logo, solids, text. Rich build, never 100K.
Leaf	**360 C**	360 U	62 / 0 / 89 / 2	#6CBD45	Customer action colour. Rarely needed in print.
Lime	**367 C**	367 U	44 / 0 / 81 / 0	#A6D754	Customer bolt and highlights.
Hi-Vis	**151 C**	151 U	0 / 58 / 94 / 1	#FF8200	Trade action colour, signage, decals.
Amber	**157 C**	157 U	7 / 42 / 72 / 2	#ECA154	Trade bolt and highlights.
Cream	**9285 C (nearest)**	—	7 / 7 / 11 / 0	#F1ECE5	Better as a natural or cream stock than as ink.
Mint	**9524 C (nearest)**	—	27 / 0 / 16 / 0	#B7F0E4	CMYK only. Accent use.

1 colour

Pantone 5535 C. Logo in Forest positive, or knocked out of a Forest solid. Stamps, receipts, single-colour merch.

2 colour

Customer: **5535 C + 367 C**. Trade: **5535 C + 157 C**. Signage, vinyl, screen print and embroidery: match thread to the spot.

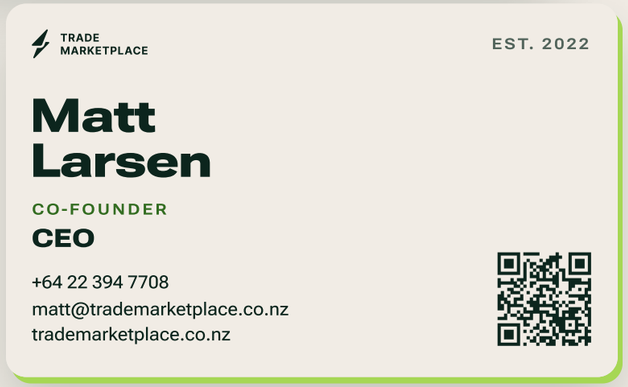

Watch-outs

Never print Forest as 100K. Small reversed text (under 8 pt) on a CMYK Forest solid will mis-register, so use the spot or go heavier. Lime and Amber are too pale for small text on white.

Print in Use

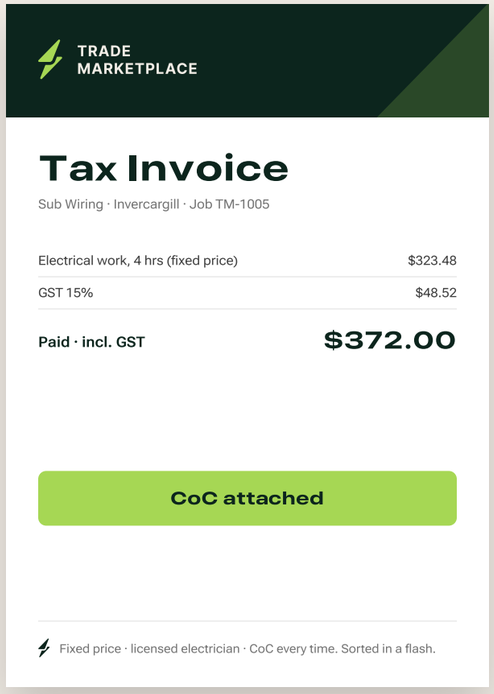

Every sparky on the platform is a billboard. Get the brand onto vans, sites and paperwork. That's how a name becomes a household name.

Business cards

Founder cards: full spec on the next page

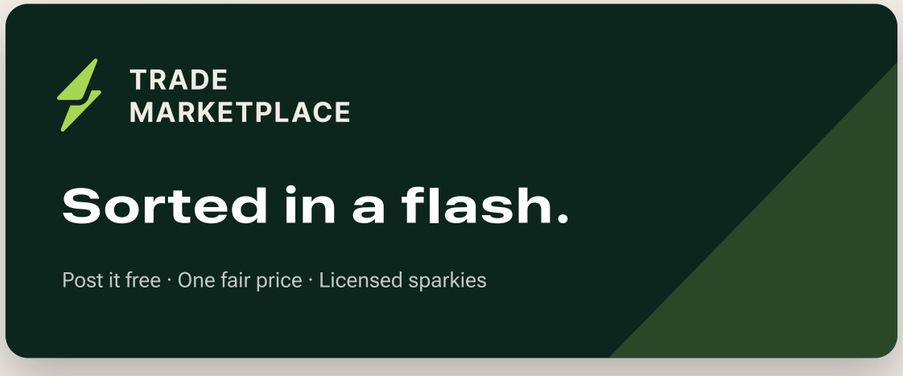

Invoices & CoC hand-over

A4 PDF from TM to the customer. Customer-facing, so green. Every job ends with the brand.

Van & window decal

100 mm round printed vinyl · 5535 C + 157 C + 151 C · for every verified sparky

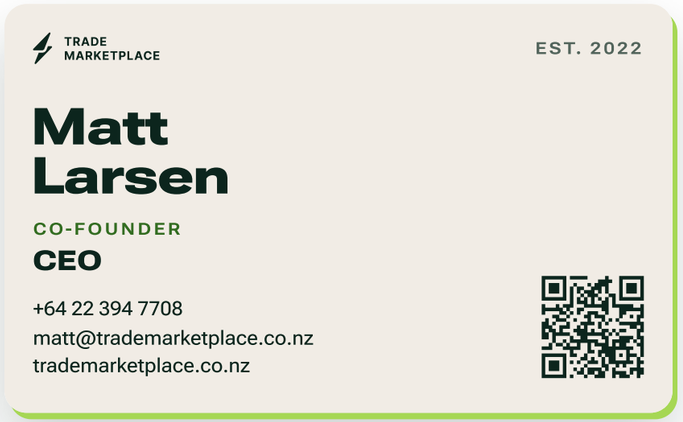

Van magnet / site sign

600 × 240 mm · CMYK + 5535 C spot · customer line for the public

Business Cards

Front · everyone

Back · Matt Larsen, Co-Founder & CEO

Back · William Larsen, Co-Founder & CTO

Back · Henri Larsen, COO

Spec

Size	90 × 55 mm trim, 3 mm bleed, 3 mm rounded corners. Re-fit to the printer's size (MOO 84 × 55, Vistaprint 91 × 55).
Stock	Heavy duplex, 600 gsm and up. Forest front, Cream back.
Ink	Spot 5535 + 367, or the CMYK builds on the Print Colours page.
Finish	Coloured edge or core in Forest or Lime. Optional spot gloss on the bolt.
Type	Roboto Flex: Trade Display (900 / 151 / opsz 28) for names and titles, Trade UI for details. SF Pro isn't licensed for print.

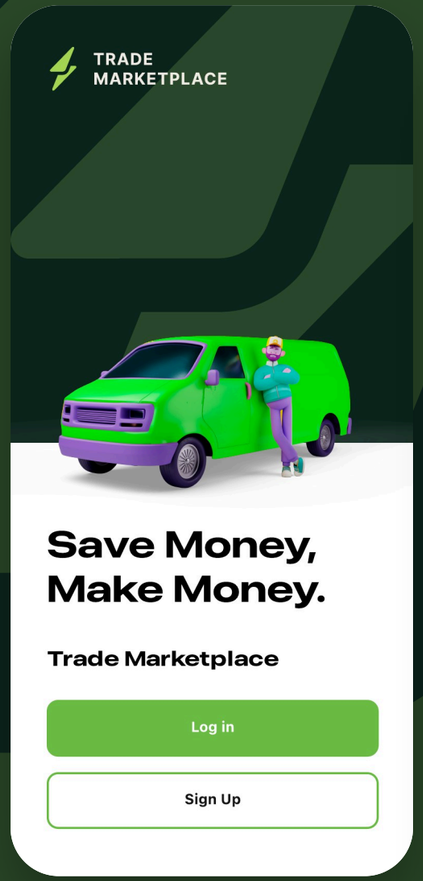

Rules

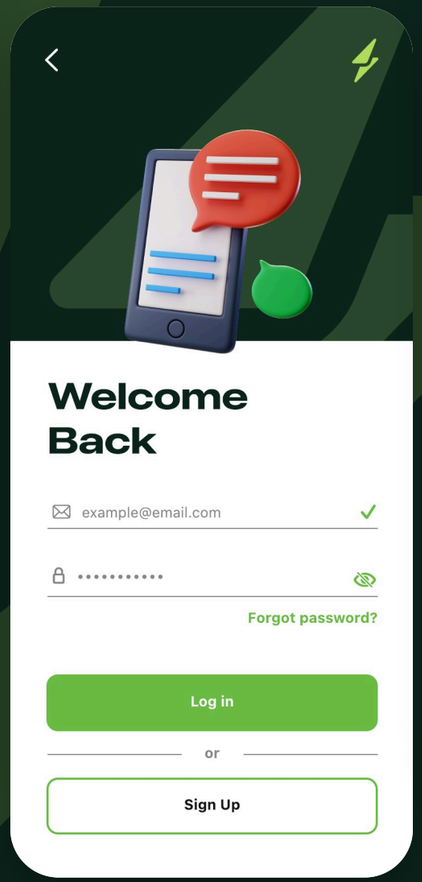

- Front is the same for everyone. Logo, background bolt and the line, nothing else.
- Back: name on two lines, then the title. Co-founders get the green CO-FOUNDER label.
- Phone in +64 format. Email is first name @ the domain. The QR code goes to the website.
- Customer-facing palette (green) for every staff card.

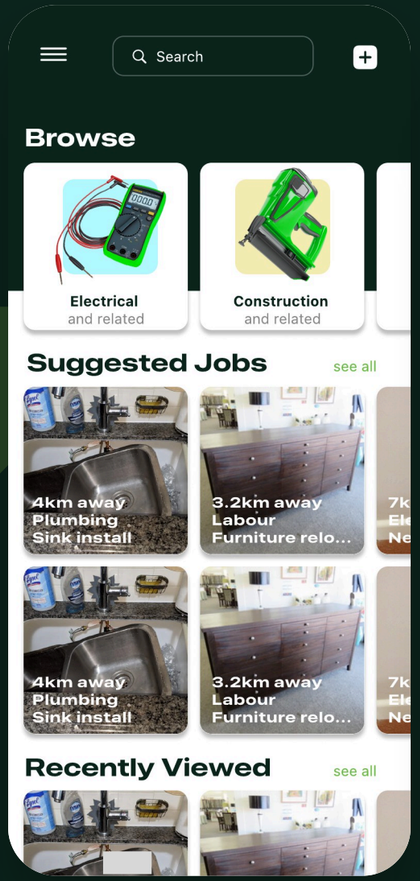

12 — IN USE

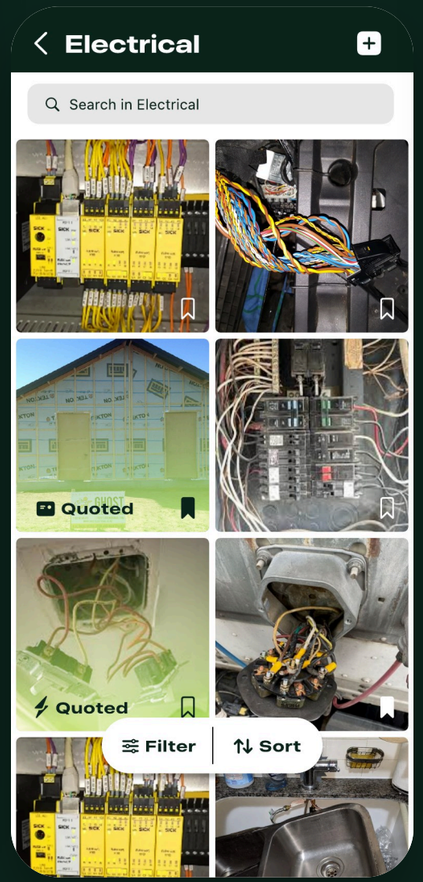

It All Together

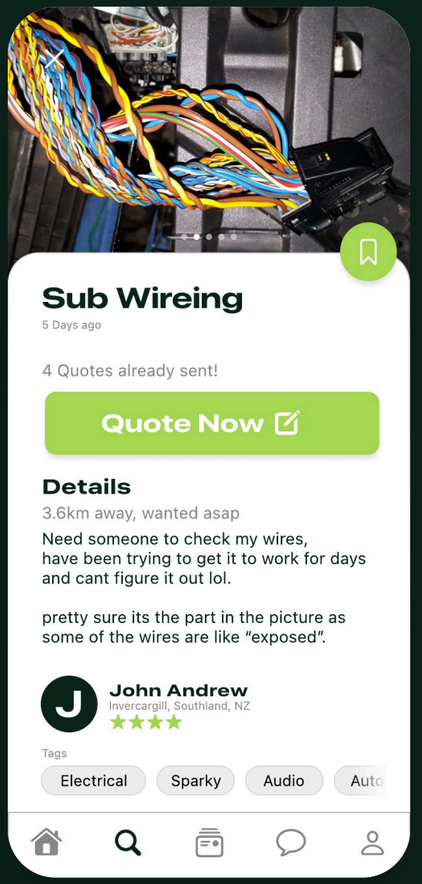

Original 2022 app designs (the visual authority). Electrician screens move to the trade palette, as shown in Two Modes.
